"META WOODRUFF." This story, the initial chapters of which appear in the Sunday Sentinel of to-day, will continue as a serial through the Daily Sentinel only to its conclusion. Mrs. Addie Deitch Frank makes her debut in "Meta Woodruff" as an authores. A daughter of Indians, the Sentinel readers naturally take interest in her work. But the story will be found sufficiently meritorious to commend itself to popularity even without the sentiment of State pride. Readers of the Sunday Sentinel, not subscribers of the daily, who wish to follow the story through the succeeding chapters should make provision for receiving the daily.

THE condition of business during the past week is indicated by the decline in bank clearings as compared with the corresponding week of last year. Boston is the only large city in which there is an increase. In New York the decrease is 29 per cent., and the average amount of the decrease outside of New York and Boston would represent about 15 per cent.

He says that a fondness for one narcotic tends to excess in another; a Canadian gentleman who consulted him bad taken daily for several years ten to twenty grains of na subcutaneously, sixty to ninety grains of chloral, and one to two pints of of whisky. Yet the man was suffering an organic trouble of the heart. The doctor states that as a soporific for "exopium habitues," he knows of no medicine equal to Indian hemp.

THE Boston Post's Washington correspondent says: "Some day Lieutenant Garlington will be found to have done brave deeds and to have made a more successful fight against the elements than any one else who has been connected with the Signal Service Arctic expeditions. His retreat over 600 miles in open boats, and the consequent saving of lives of all his men, was pluckier and showed more judgment than anything done by the last expedition. He was practically in the same situation and was further north when his ship was tost than Greely was at Cape Sabine. Greely, too, had boats, as Garlington had, but the latter took to them, made his journey, and saved his men, while Greely knocked his boats to pieces for fuel and lost most of his party by starvation."

GOSSIPING.

There are social evils which appear to be impregnable to assaults of whatever kind. and gossiping is one of them. One of the beauties of the isolation of the parent couple in Eden was that there was no gossip between them. Adam having no club nor street corner familiars and Eve not belonging to any sewing society and having no pop callers, we may resonably infer there was period in the history of the human family when there was no neighborhood gossiping The period was brief, however, until we find men and women telling tales on each other, and from that age down to the present we may read homilies and hear denuncations of the reprehensible practice. But gossip ing has maintained life and lustiness. appears to have, like obstinacy, thrived under abuse. If the evil is ever suppressed it must be by some other tactics than assault. It might be successfully flanked human family would leisurely contemplate the difference between the tattler and the person whose tongue speaks no ill. There are some of the latter class-both women and men. There are those who not only do not thus talk, but who fain would not hear evil spoken of any, who even will seek to distrain hurtful words. For one of these, who can withhold admiration? What a world of good is accomplished by these in voiding difficulties.

It is easy for irreparable injustice to be done a good character by idle talk even when such is not intended. Dame Gossip is an fighting and sanguinary fighting at that, is sarrant gad-about, carrying a paint pot and brush by which a fresh coating is put on any story with her every repetition of it. From "something black" she has but a few calls to make to produce the "three black crows." But for the conservative, scandal-hating element of society, the old dame would have and keep the ma jority of mankind in perpetual turmoil. A petted, only daughter of a wealthy widow wedded a young lawyer, and the two settled down to housekeeping in the town where the bride's mother resided. After two months of wedded life the young wife rushed in sgitation to her mother's house, one day, to repeat a silly scandal upon her husband which she had just received trom the lips of a servant, She had only begun repeating the story when the mother rose, standing, and pointing to the door, said "Leave my house, and never put foot in it nor tell any one you are my daughter again until you have sufficient self-respect not to listen to the gabble of servants, and to never utter a word of gossip to any one concerning your husband." Five years later the wife told her husband, for the first time, of the incident, and declared that her uninterrupted happiness during those five years was largely due to the rebuke received from her disappear faster, and cause us a greater loss

> The most detestable gossips are those who all the saving made by economical uses of go back and forth between persons estranged, widening the breach between them. The warmest of friends may by this process be turned into uncompromising enemies. He or she who acts the role of stirrer of strife is nothing less than criminal. He or she who acts the part of peace-maker in such premises has the expressed approval of the Divine Master Himself, he having said "they shall be called the children of God."

A notable consummation of a suit between two well-to-do planters occurred four years ago in a Superior Court of a Southern State. The estates of the litigants, each comprising a number of hundred acres, lay adjoining. and even before either owner was in possession one fence had divided them. Both were high strung, dignified men, the weakness of each being that of inherited hot-headedness. Through the prevarication of some sinister neighbor A was led to make some impulsive criticism upon B, which the listener repeated to the latter. B retaliated in kind, which A hearing of, the friendship of long standing was ruptured. Twin fences were determined on, but they could not agree upon how and where they should be run. A suit at law by A was met with a countersuit by B. For two years after filing of the actions continuances had for one cause or another. When the cases were at length set, and each party had a half hundred witnesses at court. the Judge of the Court asked if any effort had been made to have the differences between the litigants settled by arbitration. The respective attorneys answered that no agreement could be had upon who should constitute a board of arbitration. The Judge then, ordering the attorneys to be seated, addressed the two principals, asking them to come forward and stand one on either side the bench. Leaning back in his chair and looking first one and then the other in the face as he proceeded he reminded them of the boyheod time when they three had played and attended school together: of how their respective fathers had through life lived as neighbors not only peaceably, but cordially; of three graves near together in the country church yard, in which the three fathers were buried; of the early manhood of himself and the two litigants when they were bosom companions and inseparable. "Gentlemen," he said, "I have always found in you both the same honorsble qualities that bound me to you then; may I be permitted to settle this dispute beevery foot of the boundary line," he then have had made." SOME GREAT PICTURES. The price, \$350,000, which the British Government has practically agreed to pay the the Duke of Marlborough for a Raphaei and Vandyke, is thought by some of the English ournals to be warranted, because they could in future be sold for more then that amount .-- Foreign Item.

paid the Duke of Dalmatia (Marshal Soult) for the celebrated picture, by Murillo, of the Virgin, standing with one foot in the crescent of the moon, her hands folded on her breast, and surrounded by a cloud of cherubim, that cost some 670,000 francs. The Pope was offered a million dollars for Raphael's "Transfiguration," or Domenichino's "Communion of St. Jerome," and would not listen to it. About as much has been offered for the "Sistine Madonna," of Rahpael, so well known in this county-like Murillo's-by engraving, which has long been in the Dresden gallery, but promptly refused. The great works of art, at least those of the "Old Masters," are not to be bought, and those of modern masters, like Turner, and Gericault, and Schaeffer, are fast rising to the same level. They will get fixed in great public galleries finally, except a few held by wealthy owners, like the "Venus Victrix," of Canova in the Casino of the Villa Borghese at Rome, celebrated in Hawthorne's "Marble Faun." The statue is said to have been modelled from the nude form of the great Napoleon's sister, Pauline, wife of Prince Borghese, The celebrated picture of the baker's girl, the "Fornavina," by Raphael, and the still more celebrated one of Beatrice Cenci, engravings of which are usually as common as those of Washington, are in the private gallery, regularly opened to the public, however, of the Prince Barberini in Rome. A number of other noted works of art are also in the private galleries of Roman or Florentine nobles, but the greatest are in the galleries belonging to the Government or in churches, where they are as fully the prop-

As we have long been able to make excellent lumber of sawdust, and are now making paper of it, and making car-wheels, boats, houses and mill-gearing of paper, it becomes a question whether the demand for timber will not make our fast disappearing forests in the effect of the earth's denudation than sawdust and chips, and whether in the "long run" it won't be cheaper to make paper of rags, and rid the world of the dirty rubbish that there will be no use for if sawdust dis-

THE late President Peck, of the Terre Haute and Indianapolis Railroad, used twice year to walk the entire distance between Indianapolis and Terre Haute, carrying on his arm a peck bucket in which he put any piece of iron he saw lying near the track, ieces of spikes, coupling-pins or shackles. ben his basket became weighty he would dump the consents near the track for the

section men to gather .- Journal . Mr. Peck never walked from Indianapolis to Terre Haute in his life. This foolish story has grown out of a very simple affair, like the "three black crows." He used to walk along the track of the road in and near the city, and pick up the lost bolts, links and nuts he found, and lay them in little heaps for the track hands to bring in, but that is all.

"That is a good present for a Democrat," said Colonel Lamont, looking reflectively at the contents of the locket; "it is some of the hair of Thomas Jefferson, founder of the Democratic party. It was given me by Henry S. Randall, whose father wrote the standard life of Jefferson, I have known the son many years. He could not have given me a present which I would have valued more."
